

Main HYB-model papers in 2001-2011 and objects ([MERCURY] [VENUS] [THE MOON] [MARS] [TITAN] [CERES])

1. [Mars] Diéval, C., E. Kallio, S. Barabash, G. Stenberg, H. Nilsson, Y. Futaana, M. Holmström, A. Fedorov, R. A. Frahm, R. Jarvinen and D. A. Brain, A case study of proton precipitation at Mars: Mars Express observations and hybrid simulation, *J. Geophys. Res.*, 2011, *submitted*
2. [Titan] Sillanpää, I., D. T. Young, F. Cray, M. Thomsen, D. Reisenfeld, J.-E. Wahlund, C. Bertucci, E. Kallio, R. Jarvinen, and P. Janhunen, Cassini Plasma Spectrometer and hybrid model study on Titan's interaction: Effect of oxygen ions, *J. Geophys. Res.*, 116, A07223, doi:10.1029/2011JA016443, 2011.
3. [Mars , Venus and a comet] Kallio, E. and R. Jarvinen, Kinetic effects on plasma escape at Mars and Venus: Hybrid modeling studies, *Earth Planets and Space*, 2011. *accepted*
4. [Mars] Kallio, E. and S. Barabash, Magnetized Mars: Spatial distribution of oxygen ions, *Earth Planets and Space*, 2011. *accepted*
5. [Mars] McKenna-Lawlor, S., E. Kallio, R. Jarvinen and V. V. Afonin, Magnetic shadowing of high energy ions at Mars: SLED/Phobos-2 observations and hybrid model simulations, *Earth Planets and Space*, 2011. *accepted*
6. [Mars] Diéval, C., E. Kallio, G. Stenberg, S. Barabash and R. Jarvinen, Hybrid simulation of the proton precipitation patterns onto the upper atmosphere of Mars, *Earth Planets and Space*, 2011. *accepted*
7. [Venus] Jarvinen R., Kallio E., Dyadechkin S., Janhunen P., Sillanpää I., Widely different characteristics of oxygen and hydrogen ion escape from Venus, *Geophys. Res. Lett.*, 37, L16201, doi:10.1029/2010GL044062. 2010.
8. [Venus] Zhang T. L., Baumjohann W., Du J., Nakamura R., Jarvinen R., Kallio E., Du A., Balikhin M., Luhmann J. G., Russell C.T., Hemispheric asymmetry of the magnetic field wrapping pattern in the Venusian magnetotail, *Geophysical Research Letters*, VOL. 37, L14202, doi:10.1029/2010GL044020, 2010.
9. [Venus] Jarvinen R., Kallio E., Janhunen P., Pohjola V., Sillanpää I., Grid convergence of the HYB-Venus hybrid simulation, *Astronomical Society of the Pacific Conference Series, Numerical Modeling of Space Plasma Flows: ASTRONUM-2009, ASP Conference Series, Vol. 429*, 2010.
10. [Solar System objects] Pohjola, V. and E. Kallio, On the modeling of planetary plasma environments by a fully kinetic electromagnetic global model HYB-em, *Ann. Geophys.*, 28, 743-751, www.ann-geophys.net/28/743/2010/, 2010.
11. [Venus] Jarvinen R., E. Kallio, P. Janhunen, S. Barabash, T. L. Zhang, V. Pohjola and I. Sillanpää, Oxygen ion escape from Venus in a global hybrid simulation: Role of the ionospheric O⁺ population *Ann. Geophys.*, 27, 4333-4348, 2009.
12. [Mars] Kallio, E. K. Liu, R. Jarvinen, V. Pohjola and P. Janhunen, Oxygen ion escape at Mars in a hybrid model: high energy and low energy ions, *Icarus*, doi:10.1016/j.icarus.2009.05.015, Vol. 206, Issue 1, pp. 152-163, 2010.
13. [Mars] Brain, D., S. Barabash, A. Boesswetter, S. Bougher, S. Brecht, G. Chanteur, D. Crider, E. Dubinin, X. Fang, M. Fraenz, J. Halekas, E. Harnett, M. Holmstrom, E. Kallio, H. Lammer, S. Ledvina, M. Liemohn, K. Liu, J. Luhmann, Y. Ma, R. Modolo, U. Motschmann, H. Nilsson, H. Shinagawa, and N. Terada, A Comparison of Global Models for the Solar Wind Interaction with Mars, doi:10.1016/j.icarus.2009.06.030, Vol. 206, Issue 1, pp. 139-151, 2010.
14. [Venus] Liu, K., E. Kallio, R. Jarvinen, H. Lammer, H.I.M. Lichtenegger, Yu. N. Kulikov, N. Terada, T.L. Zhang and P. Janhunen, Hybrid simulations of the O⁺ ion escape from Venus: Influence of the solar wind density and the IMF x component, *Adv. Space Res.*, Volume 43, Issue 9, pp 1436-1441, doi:10.1016/j.asr.2009.01.005, 2009.
15. [Ceres] Kallio, E. P. Wurz, R. Killen, S. McKenna-Lawlor, A. Milillo, A. Mura, S. Massetti, S. Orsini, H. Lammer, P. Janhunen and W-H. Ip, On the impact of multiply charged heavy solar wind ions on the surface of Mercury, the Moon and Ceres, *Planetary and Space Science*, doi:10.1016/j.pss.2008.07.018, 7 Vol. 56, 11, Pages 1506-1516, 2008.

Main HYB-model papers in 2001-2011(con't) and objects ([MERCURY] [VENUS] [THE MOON] [MARS] [TITAN] [CERES])

16. [Mars] Kallio, E., A. Fedorov, E. Budnik, S. Barabash, R. Jarvinen, and P. Janhunen, On the properties of O⁺ and O²⁺ ions in a hybrid model and in Mars Express IMA/ASPERA-3 data: A case study, *Planetary and Space Science*, 56, 1204–1213, doi:10.1016/j.pss.2008.03.007, 2008.
17. [Titan] Kallio, E., I. Sillanpää, R. Jarvinen, P. Janhunen, M. Dougherty, C. Bertucci and F. Neubauer, Morphology of the magnetic field near Titan: Hybrid model study of the Cassini T9 flyby, *Geophys. Res. Lett.*, 34, L24S09, doi:10.1029/2007GL030827, 2007.
18. [Venus] Jarvinen R., E. Kallio, I. Sillanpää, and P. Janhunen, Hybrid Modelling the Pioneer Venus Orbiter Magnetic Field Observations, *Adv. Space Res.*, Volume 41, Issue 9, 2008, Pages 1361-1374, doi:10.1016/j.asr.2007.10.003, 2008.
19. [Titan] Sillanpää, I., E. Kallio, R. Jarvinen, and P. Janhunen, Oxygen Ions at Titan's Exobase in a Voyager 1 Type 1 Interaction from a Hybrid Simulation, *JGR*, 112, A12205, doi:10.1029/2007JA012348, 2007.
20. [Mars] Kallio, E., S. Barabash, P. Janhunen and R. Jarvinen, Magnetized Mars: Transformation of Earth-like magnetosphere to Venus-like induced magnetosphere, doi:10.1016/j.pss.2007.12.005, 56, Issue 6, Pages 823-827, *Planetary and Space Science*, 2008.
21. [Venus] Kallio E., T.L. Zhang, S. Barabash, R. Jarvinen, I. Sillanpää, P. Janhunen, A. Fedorov et al., The Venusian induced magnetosphere: A case study of plasma and magnetic field measurements on the Venus Express mission, doi:10.1016/j.pss.2007.09.011, 56, Issue 6, 796-801, *Planetary and Space Science*, 2008.
22. [Mars] Frilund, H., E. Kallio, M. Yamauchi, A. Fedorov, P. Janhunen, R. Lundin, J.-A. Sauvaud, and S. Barabash, The Magnetic Field Near Mars: A Comparison Between A Hybrid Model, Mars Global Surveyor and Mars Express Observations, doi:10.1016/j.pss.2007.12.003, Vol. 56, Issue 6, 828-831, *Planetary and Space Science*, 2008.
23. [Mars] Frahm, R. A., E. Kallio, F. Yoshifumi, A. Fedorov, and P. Janhunen, Variations of the magnetic field near Mars caused by magnetic crustal anomalies, doi:10.1016/j.pss.2007.12.018, 56, Issue 6, 856-860, *Planetary and Space Science*, 2008.
24. [Mars] Kallio, E., R. A. Frahm, Y. Futaana, A. Fedorov and P. Janhunen, Morphology of the magnetic field near Mars and the role of the magnetic crustal anomalies: Dayside region, doi:10.1016/j.pss.2007.12.002, Vol. 56, Issue 6, 852-855, *Planetary and Space Science*, 2008.
25. [Mars] Gunell, H., E. Kallio, R. Jarvinen, P. Janhunen, M. Holmström and K. Dennerl, Simulations of solar wind charge exchange X-ray emission at Venus, *Geophys. Res. Lett.*, 34, L03107, doi:10.1029/2006GL028602, 2007.
26. [Mars] Kallio et al., Energisation of O⁺ and O²⁺ ions at Mars: An analysis of a 3D quasineutral hybrid model simulation, *Space Sci. Rev.* doi: 10.1007/s11214-006-9120-z, Volume 126, Numbers 1-4 / October, 2006.
27. [Venus] Kallio, E., R. Jarvinen and P. Janhunen, Venus-Solar Wind Interaction: Asymmetries and the Escape of O⁺ Ions, *Planetary and Space Science*, Volume 54, Issues 13-14, 1472–1481, 2006.
28. [Mars] Kallio et al., Ion escape at Mars: Comparison of a 3-D hybrid simulation with Mars Express IMA/ASPERA-3 measurements, *Icarus*, Volume 182, Issue 2, Pages 350-359, doi:10.1016/j.icarus.2005.09.018, June 2006.
29. [Titan] Sillanpää, I., E. Kallio, P. Janhunen, W. Schmidt, A.-M. Harri, T. Mäkinen, K. Mursula, J. Vilppola, and P. Tanskanen, Hybrid simulation study of ion escape at Titan for different orbital positions, *Adv. Space Res.*, Volume 38, 4, Pages 799-805, doi:10.1016/j.asr.2006.01.005, 2006.
30. [Moon] Kallio, E, Formation of the lunar wake in quasi-neutral hybrid model, *Geophys. Res. Letters*, Vol. 32, L06107, doi:10.1029/2004GL021989, 2005.

Main HYB-model papers in 2001-2011 (con't) and objects ([MERCURY] [VENUS] [THE MOON] [MARS] [TITAN] [CERES])
